

Romeo®

24" HIGH DEFINITION CUTTER

Siser®

Pursue larger projects with passion.

SIMPLY ADVANCED

The Romeo® by Siser® has been designed to be not only advanced, but intuitive as well. Loaded with powerful features that are easy to understand, *Romeo* is built to seamlessly adapt to your workflow—no matter your experience or skill level.

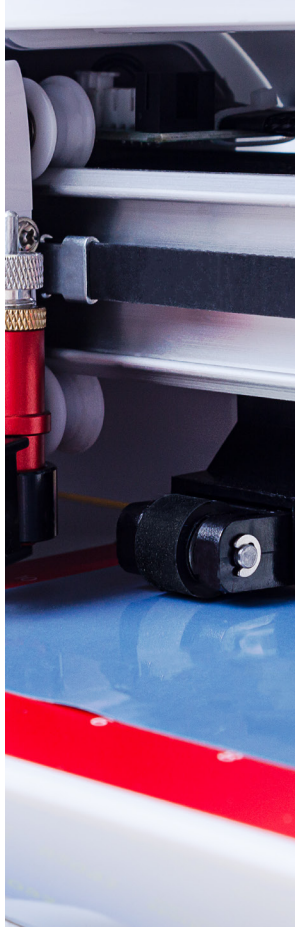

Romeo elevates the creating experience for those who have high volume workflows. *Romeo* can accommodate materials up to 24" wide with an unobstructed workspace that makes production quick and easy. When you need more control, *Romeo* also includes four adjustable pinch rollers with variable grit rollers for maximum stability, no matter what type of material you're using.

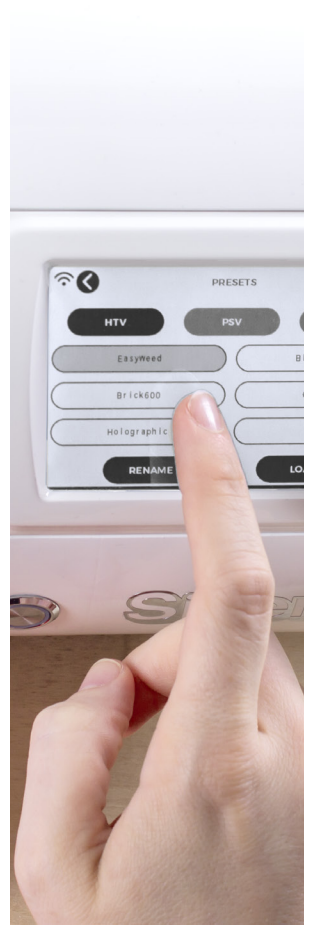

PACKED WITH FEATURES

For those who work with high volumes, sometimes a 12" cutter just doesn't cut it. *Romeo* is twice the size of *Juliet*®, meaning it can cut materials up to 24" in width!

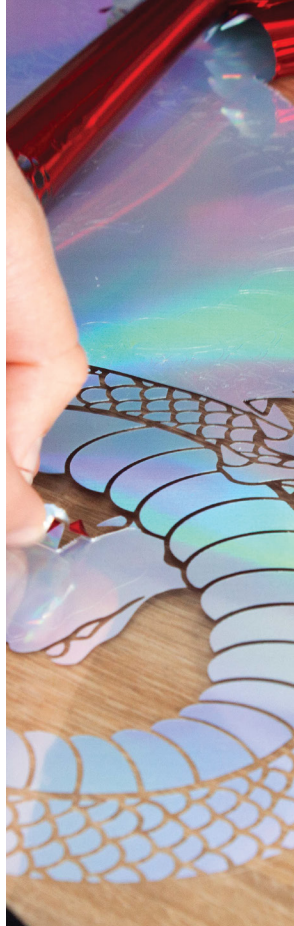

Thanks to adjustable pinch rollers and variable grit rollers, *Romeo* can adapt to accommodate and cut a wide range of materials with exceptional stability and precision.

Romeo is built for the creators who want to maximize their potential. That's why *Romeo* has an unobstructed workspace to make production easier so you can get more done, faster.

Print & cut projects are no problem! Using the camera built-in to the machine head, *Romeo* can read registration marks and cut full color designs with ease.

Small details equal huge potential! Thanks to its pinpoint accuracy, *Romeo* can cut some of the most intricate details with precision down to .01mm without skipping a beat.

Romeo does more than just cut! Create beautifully drawn designs using *Siser* Sublimation Markers (or other drawing utensils) with the included marker adapter.

LEONARDO® DESIGN STUDIO

A powerful cutter is nothing without powerful software. That's why Leonardo® Design Studio was created to be the perfect companion software to the *Romeo* cutter. Easily connect *Romeo* to *Leonardo* Design Studio via either the included USB cable or a WiFi connection and you're ready to go.

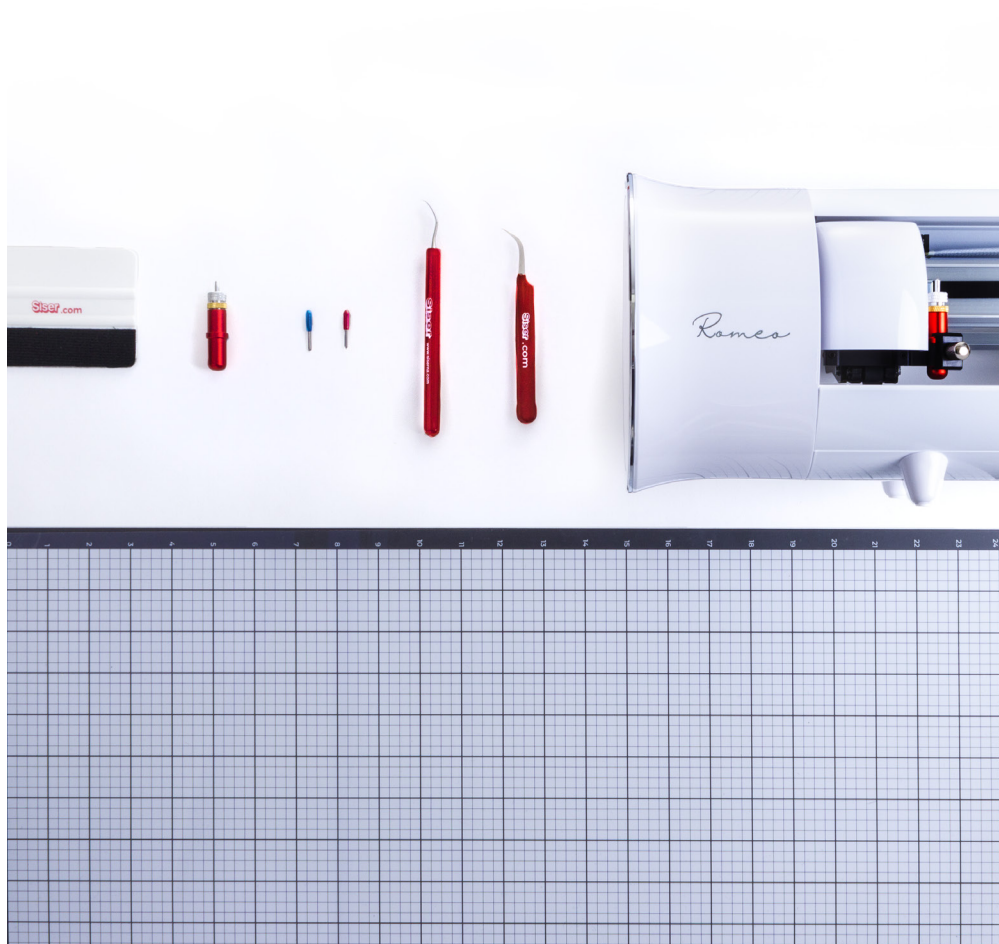

The best part? *Leonardo* Design Studio isn't just cut software— it's also an incredibly versatile workspace. Use the built-in canvas and tools to create your own artwork, or download pre-made files from the extensive art library. You can also view swatches and specs for every Siser® material, get inspiration from our handmade projects, learn new skills with tutorial videos, and so much more - all within a single software!

Leonardo Design Studio is free with every *Romeo* purchase.
